Crime in Ipswich compared with crime in other similar areas

Crime type:

All crime

Update

In the year ending September 2018, the crime rate in Ipswich was higher than the average crime rate across similar areas.

-  Upper bound
-  Most Similar Group average
-  Lower bound

The red and green lines show how far the crime rate would normally vary from the average. Ipswich lies above the red line, so its crime rate is higher than normal for the group.

How to interpret this chart

This chart compares the crime rate in your local area to the average crime rate across similar areas. It shows the total number of crimes over a twelve month period per thousand residents, for the crime type selected.

Where your area lies in relation to the red and green lines is more important than its rank among similar areas. If your area lies between the red and green lines, its crime rate is normal for the group. If your area lies above the red line, its crime rate is higher than normal for the group, and similarly, if your area lies below the green line, its crime rate is lower than normal.

The areas shown in this chart are those that have been assessed to be most similar to your own. However, the circumstances within these areas do still vary and these variations can have an impact on the crime rates observed.
